

XTREME PERFORMANCE

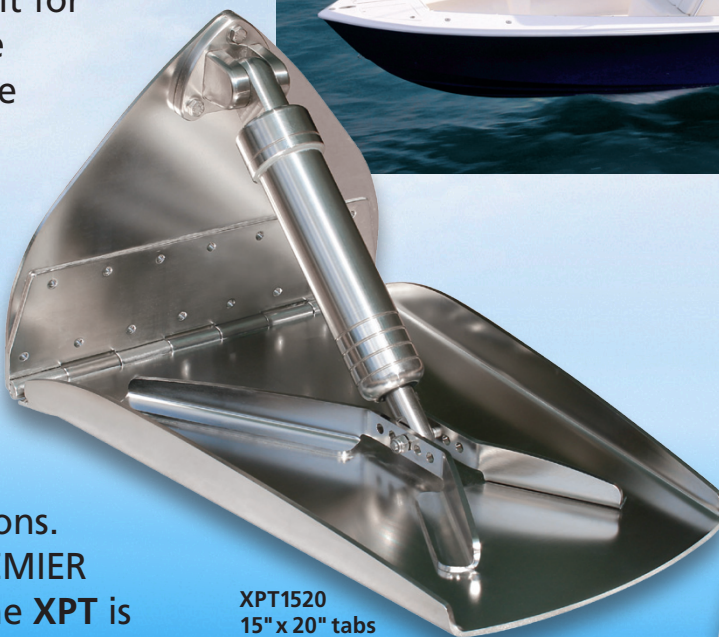

DURABILITY POWER PERFORMANCE PRECISION

XPT SYSTEM: Xtreme Performance Tabs

For fast, high-performance boats from 30 feet (9 m) to 45 feet (14 m).
(Not recommended for racing boats.)

Sport fishing yachts and other high-performance powerboats now have a trimming solution built for the rigorous, aggressive style of boating they are designed to dominate.

Form definitely meets function when the highest quality materials combine with the **POWER OF HYDRAULICS** – the preferred technology in demanding applications. Part of the Bennett PREMIER LINE class of systems, the XPT is also manufactured entirely out of stainless steel. With all the features of the PREMIER LINE, the system is built to the highest standards of design, strength and precision to assure trouble-free operation under the most demanding conditions.

XTREME PERFORMANCE

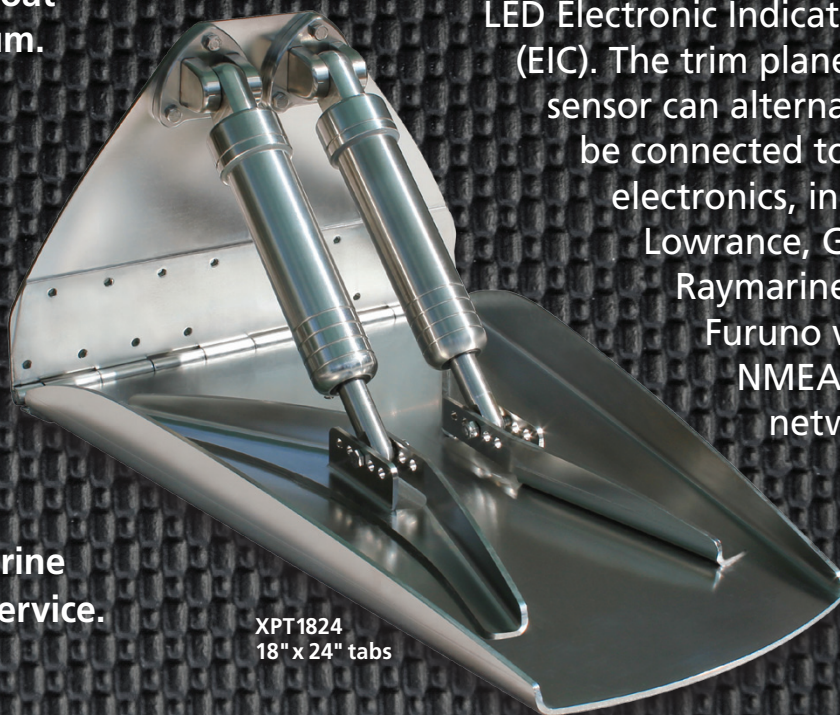

DURABILITY POWER PERFORMANCE PRECISION

XPT System Advantages:

- » **All Stainless Steel construction** assures the highest resistance to galvanic corrosion from dissimilar metals.
- » **Powerful dual acting hydraulics** lock the solid stainless steel actuators into place, securing planes while backing down or in other extreme conditions.
- » **No external hydraulic lines, wires or cables** exposed to the harsh marine environment.
- » **No peeling of powdercoat** from corroded aluminum.
- » **Multiple actuator mounting points** on the trim plane allow after-installation adjustability.
- » **Fully customizable** to fit almost any trim plane pocket or transom.
- » **Legendary Bennett Marine quality and customer service.**

- » **Multiple indication options.** Like all Premier Line systems, the XPT comes standard with a single LED Electronic Indicator Control (EIC). The trim plane position sensor can alternatively be connected to most electronics, including Lowrance, Garmin, Raymarine and Furuno via NMEA2000 network.
